

Inshore Marine Protected Area and Priority Marine Features Consultation

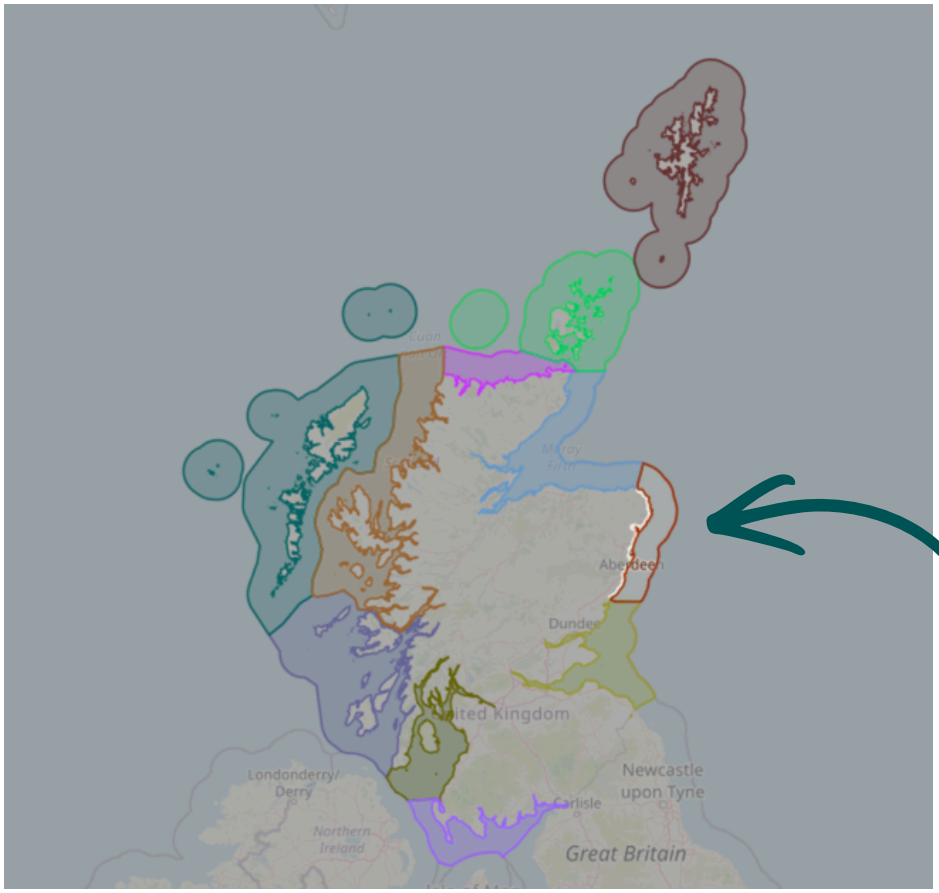

North East

11/11/2026

Introduction

Here you will find a briefing manual for the Proposed Fisheries Management Measures for Inshore Marine Protected Areas (MPAs) and Proposed Priority Marine Feature (PMF) Management Areas within the North East Marine Region.

The North East marine region is located in the northern North Sea and has a rather uniform coastline. It extends from the Moray Firth down to Montrose.

North East Marine Region

The Our Seas Coalition

The Our Seas coalition represents over 170 organisations, each with its own voice for the sea. We are united by a shared vision of greater protection for Scotland's inshore environment, however, individual members bring their own regional knowledge, priorities and perspectives on what that protection should look like. Consequently, our members will have their own individual views on the options presented within the consultation.

Our Seas encourage you to reach out to members in your area to learn more about their individual position.

The Consultation

After almost a decade of delay, the Scottish Government has finally launched its consultation on the future protection of inshore marine habitats and species. You can view it here.

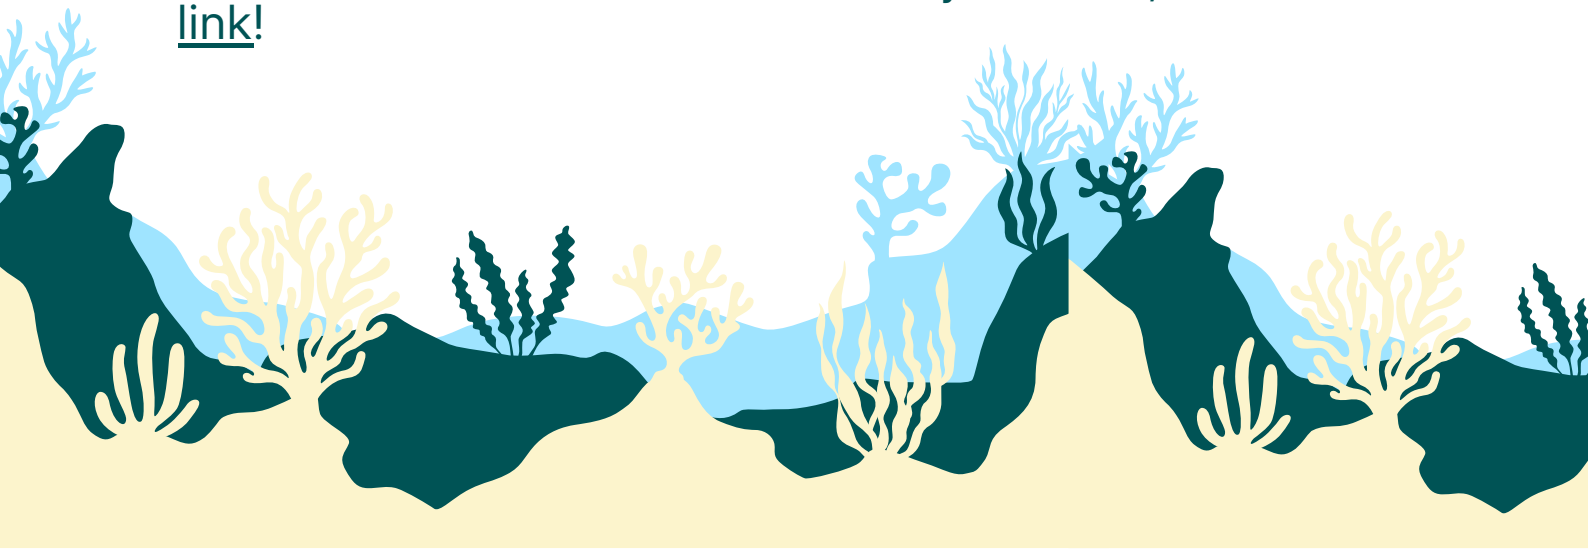

This is the chance for real protection to be implemented in Scotland's inshore waters after over 10 years of simply designation.

Within this consultation, the Scottish Government is asking for the public's opinion on proposed fisheries management measures for both sites and areas, where sites include: NCMPAs, SACs and SPAs and areas include locations where the 11 Priority Marine Features features have been identified outside MPAs.

In the North East, the consultation includes proposed fisheries management measures for:

0 NCMPAs | *0 SACs* | *3 SPAs* | *0 PMF areas*

Within this marine region, there are no sites designated to protect a seabed feature or PMF management areas. Despite this, we at Our Seas still think it should be protected from more damaging fishing practises. For more information on other sites in your area, follow this link!

What protection can look like...

On the Isle of Arran, Scotland's only No Take Zone and wider South Arran MPA show how effective marine protection can be, with bottom trawling and dredging restrictions helping to protect and restore the seabed.

Research has found increases in king scallop and lobster numbers, greater marine biodiversity and healthier habitats, while supporting local communities through activities such as diving, snorkelling and commercial scallop diving. Go to COAST's website to read more.

Our Seas Coalition's Position

MPAs

Protect all seabed MPAs from bottom trawling and dredging to support healthy marine ecosystems, coastal communities and sustainable livelihoods.

If you agree, you should submit a response, as follows;

- Support **Option 2** for all the MPA seabed sites that propose a **full site closure to all bottom towed fishing gear**. This would mean that more damaging fishing practices such as bottom trawling and scallop dredging will not be allowed in sites designated to protect the seabed, allowing seabed habitats to recover.

- There are 3 sites that have a seabed feature designated which do not propose full site closure to all bottom towed gear, and Our Seas will be calling for stronger protections for these sites in the form of full site closure to all bottom towed gear. These are, Clyde Sea Sill NCMPA, Moine Mor SAC and North East Lewis NCMPA.

Why?

Because the sedbed should be protected. Bottom trawling and dredging physically disturb the seabed, damaging species and reducing the abundance and diversity of marine life. Closing seabed MPAs to bottom-towed fishing allows seabed habitats to recover and provides the **strongest protection** for the features the MPAs were designated to conserve.

How to Protect the North East

While there are no sites for a seabed feature or PMF management areas in the North East Marine region, there should still be a level of protection implemented to protect our marine environment.

If you agree, you could submit a response, as follows;

- In reference to questions 3 and 4 (general questions) and any other questions asking about specific PMFs you should:

- Support Option 2 at a minimum. We then encourage you to also ask for at least 30% of Scotland's inshore waters to be protected from the more damaging fishing activities like bottom trawling and dredging, in line with the coalition's ask of a modern inshore limit adapted to the needs of each Scottish Marine Region.

- If you want to go into more detail, Our Seas suggests this could look like:
    - In the West Highlands Marine Region no dredging or trawling within 3 nautical miles of shore.
    - In the Outer Hebrides Marine Region no dredging or trawling within 1 nautical mile of shore.
    - As Shetland has it's own Regulatory Order, leave it to to resolve it's own protection.
    - **Throughout the rest of the Scottish Marine Regions, including the North East, no dredging or trawling within 1 nautical mile or waters shallower than 45/50m.**

Regional Members List

Aberdeenshire
- Ellon Sub Aqua Club
- OpenRoad Ltd
- Project Media
- Saltwater Life
- Shark and Skate Scotland

Angus
- Esk Rivers and Fisheries Trust

Argyll & Bute
- Argyll District Salmon Fishery Board
- Argyll Fisheries Trust
- Carna Coast and Communities
- Coastal Connection
- Community Association of Lochs and Sounds (CAOLAS)
- Conor Ryan Photography
- Craignish Restoration of Marine and Coastal Habitat (CROMACH)
- Eda Frandsen Sailing Ltd.
- Friends of the Sound of Jura
- Heart of Argyll Wildlife
- Kilchoan Estate
- Kyles Coastal Community
- Loch Visions
- Lochaber Sub Aqua Club
- Lochnell Oysters
- Majestic Line
- Mull Charters
- Oban Sea School
- Ocean Gives
- Puffin Divers
- Save Kintyre Seas
- Sea Freedom Kayaks
- Sea Kayak Argyll and Bute
- SeaTrek Scotland
- SeaWilding
- Sealife Adventures
- Tighnabruaich Sailing School
- Wild Argyll
- Wreckspeditions

Arran and Ayrshire
- Arran Eco Savvy
- Ayr Sea Angling Club
- Clyde Porpoise
- Community of Arran Seabed Trust (COAST)
- Fairlie Coastal Trust
- Kilmarnock Sub Aqua Club
- Mara Deli and Fish Restaurant
- Nature Library
- River Eachaig Syndicate
- Scottish Sea Angling Conservation Network
- Terra Mare

Berwickshire
- Berwickshire Marine Reserve
- Firth of Forth Lobster Hatchery
- Sea The Change
- Snorkel Wild
- The Scottish Coastal Cleanup

East Lothian
- Coast to Coast Surf School
- Lawson Wood Photography
- Ocean Vertical

Edinburgh
- Black House Water Sports
- Blue Marine Foundation
- Cycle For The Seas
- Earth in Common
- Fauna & Flora
- Fish Legal
- National Trust for Scotland
